RE: Letter of Recommendation for LinkTech Incorporated

LinkTech has performed several Category 5E cabling jobs for the district over the past couple of years. In every case I have been very pleased with the responsiveness of Ramon Melecio and the entire LinkTech Team. I have met several employees of the firm and have found each and every one to be professional and courteous. In a school setting we are always concerned about the safety of children when work is being performed in a building during school hours. LinkTech has demonstrated that they share our concerns and they take precautions to protect the safety of our children. I have also been extremely pleased with both the workmanship and timeliness of job completion each time LinkTech has performed work for us.

I have been completely satisfied with every aspect of doing business with LinkTech and have no reservations in recommending their services to others.

David S. Henrich
